BUILDING QUALITY PRODUCTS FOR OVER 20 YEARS!

ABOUT US

U. S. Whirlpool, Inc was founded in 1997 in the metro Atlanta area. Our bathtubs and shower pans are the highest quality ACRYLIC surface backed by fiberglass, far superior to the gel-coated fiberglass and marble tubs.

Today, we carry a full line of acrylic bathtubs, acrylic shower pans, air massage systems, whirlpool systems, shower drains and LED lighting. We take pride in giving our customers excellent products and setting industry standards in service.

Jimmy T. Long, Owner

U.S. Whirlpool, Inc.

TUB STYLES

Air Jet Bathtub

An air jet bathtub is the general description of a bathtub built with bubble-making air jets. Each jet has anti-microbial hose to insure no bacteria growth. The system comes with a 1 HP air blower that automatically heats the air to 145 degrees to keep your bath water from cooling off and allowing a more comfortable and longer air therapy session. The jet configuration for air massage systems will contain 18 or 24 jets. The Air Jet Tub includes a timer that automatically comes on 30 minutes after the tub has been stopped. It runs for 5 minutes and dries the air lines. Air massage systems requires a 20Amp GFCI dedicated circuit and an access panel.

Whirlpool Bathtub

A whirlpool bathtub is the general description of a bathtub built with therapeutic water jets. Each whirlpool bathtub will come with 4, 6, 8 or 11 whirlpool jets and a pump. We plumb our whirlpool tubs with ainti-microbial flexible piping. They are self-draining. As with the surface of your tub the piping system needs to be cleaned regularly to prevent buildup. Trim options are standard color matched plastic, chrome, brushed nickel, and venetian bronze (also known as oil rubbed bronze). All of our whirlpool system components are manufactured directly by us in Farmersville, Texas. Trim colors are not guaranteed to match other manufactures. Whirlpool systems requires a 20Amp GFCI dedicated circuit and an access panel.

Soaker Bathtub

A soaker tub is a basic bathtub without air jets or whirlpool jets.

Combination Bathtub

A combination bathtub is built with air and water jets. A combination tub is great for different options in bathing: You can enjoy the stimulation of the air jet bubbles or relax and enjoy the therapeutic massage of the water jets. Combination tubs have recently become a very popular new trend. Each system requires a 20Amp GFCI dedicated circuit and an access panel.

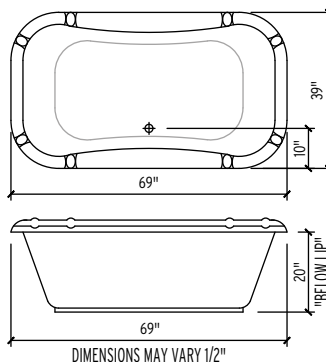

RECTANGULAR

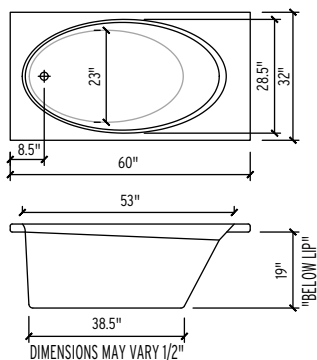

Model BR-17

39"x69"x20" Tub
72 gallons

STANDARD TUB FEATURES

1. All whirlpool units come equipped with 4, 6, 8 or 11 jets or can be customized to your specifications.
2. All whirlpool jets may be color coordinated to your unit with the options of polished brass, chrome, brushed nickel or oil rubbed bronze.
3. All whirlpool bathtubs may be equipped with a 3/4 hp or 1 1/2 hp motor depending on the number and size of jets installed in unit. Our pumps have a limited lifetime warranty.
4. All Air Jet units come standard with 18 or 24 air jets and a 1 hp blower.
5. Before any units leave our plant, they are carried through a complete testing procedure. All jets must meet optimal performance.

FIVE YEAR LIMITED WARRANTY

We warranty to the original purchaser and the original user for a time of five years with original Proof of Purchase that our bathtubs:

- Will be free of manufacturing defects.

Our liability is limited only to repair or replacement of the product at the point of original purchase F.O.B. Factory. We shall not be held liable for any installation cost, labor or damage incurred from removal or reinstallation. This warranty does not apply to products installed in commercial properties (rental properties, motels, hotels, etc.) This warranty does not apply to whirlpool units or any damage relating to installations of the whirlpool system. Your whirlpool system should be covered under a separate warranty.

This warranty will not apply:

1. If tub is not installed according to our instructions or not installed according to local building codes and ordinances.
2. If moved from original point of installation.
3. If proper care and customary cleaning instructions are not followed.
4. If bathtub is subjected to abuse, mishandling or accident.
5. If shipped outside of the United States.

To all original purchasers of its products, US Whirlpool, Inc.

Warranty its products and motors free from defects in materials and workmanship for a period of five years and limited lifetime warranty on the pump.

Products which fail or become defective during the warranty period, except as a result of freezing, accident, negligence, improper installation, use, or care, shall be repaired or replaced at our option, without charge within 90 days of receipt of defective product, barring unforeseen delays.

U.S. Whirlpool, Inc. shall not be responsible for cartage, removal and/or reinstallation labor, or any other such costs incurred in obtaining warranty replacements.

ACRYLIC CLEANING TIPS

Bathtubs: To properly clean an acrylic bathtub it is recommended to wipe the surface with a damp cloth or sponge, using household soap or liquid detergent. Stubborn dirt or stains may be removed using Clean~Way or equivalents.

DO NOT use any cleaning products containing abrasive solvents since these could damage the acrylic finish. Products like Bon-Ami, Comet, Ajax, Scrubbing Bubbles or Lysol are NOT recommended. Harsh chemicals should NEVER be used on acrylic surfaces. Anything containing alcohol or ammonia is bad for acrylic.

INSTALLATION

Continuous support of tub deck for structural stability is required.

Also recommended: Support bottom of bathtub with solid mortar grout, a high density spray foam or other like materials which can be bought at most supply houses.

Any warranty related problems should be handled through the nearest distributor in your area.

Dimensions may vary + - 1/2 inch
